## Ottawa MLS® Home Sales Stable in November Amid Growing Supply

The number of homes sold through the MLS® System of the Ottawa Real Estate Board totaled 724 units in November 2023. This was a small reduction of 1.6% from November 2022.

Home sales were 31.8% below the five-year average and 27.4% below the 10-year average for the month of November.

On a year-to-date basis, home sales totaled 11,421 units after 11 months of the year. This was a decline of 11.7% from the same period in 2022.

“Sales are performing as expected with the arrival of colder months, and an uptick in new and active listings is bringing more choice back into the market,” says OREB’s President. “While more choice may mean the pace of buying and selling has slowed, that doesn’t mean people looking to enter or upgrade in the market should sit back. Prospective buyers or those looking to upgrade have an opportunity to collaborate with their REALTOR® to carefully explore the market, identify the ideal property, and negotiate an attractive deal at their own pace. Sellers will have to manage their expectations regarding the quantity of offers and speed of transactions, and their REALTOR® is the best resource to help them confidently price and prepare their home for a quality sale.”
